

Stands in these pictures are 24" tall.

VAL-CO's Growing Stands have integrated holders for heating pipes or irrigation lines.

Eliminate "Growing Pains"

With our NEW Growing Stands System

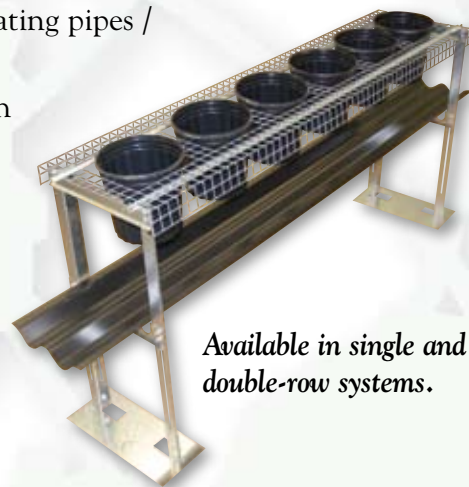

VAL-CO Introduces the "GS" (Growing Stands) System, a unique growing system for potted plants. Plants that can be grown in the GS System's raised stands are a variety of cut flowers like gerberas, orchids, roses and anthuriums, as well as strawberries and much more!

The GS System Benefits:

- Lower cost substitute for benching
- Maximum air circulation around plants
- Ability to capture and re-use drain water
- Ability to grow plants in different substrate materials
- Limits the spread of disease from plant to plant

The GS System Design Features:

- Drain troughs include end caps and drain hose
- Heavy Duty 12 GA galvanized, precision welded wire mesh tops provides for maximum air circulation
- Stands have integrated holders for heating pipes / irrigation lines
- Stands are designed for any row length
- Stands can be customized for any pot size and stand height
- Wide stand base for stability with pre-punched ground stake holes
- Strong galvanized steel stand frames
- Dual channel PVC trough with adjustable slope

Available in single and double-row systems.

Call your local VAL-CO representative or distributor for more information on these and our other fine products.
